

LETTER OF AGREEMENT

between

vatger
EDUU

and

French vACC
LFEE

Effective: 01.10.2026

1 General

1.1 Purpose

The purpose of this Letter of Agreement is to define the coordination to be applied between EDUU and LFEE when providing ATS to air traffic (IFR) on the VATSIM network.

All information and procedures described in this Letter of Agreement shall not be used for real world purposes.

1.2 Operational Status

All operational significant information and procedures contained in this Letter of Agreement shall be distributed to all concerned controllers by appropriate means. This Letter of Agreement itself constitutes public information.

1.3 Validity

This Letter of Agreement becomes effective on 01.10.2026.

1.4 Revision control

Revision	Date	Author
1.0	01.10.2026	Chriss Klosowski, David Lee, Konstantin Eierhoff

2 Areas of Responsibility and Sectorization

2.1 Areas of Responsibility

The lateral and vertical limits of the respective areas of responsibility are as follows:

2.1.1 Karlsruhe UAC

Lateral limits: Rhein UIR as described in AIP Germany

Vertical limits: FL245 – FL660

2.1.2 Reims ACC

Lateral limits: Reims FIR as described in AIP France

Vertical limits: FL195 – UNL

2.2 Sectorisation

2.2.1 Karlsruhe UAC

For detailed sectorization of Karlsruhe UAC sectors refer to vats.im/eduu.

2.2.2 Reims ACC

For detailed sectorization of Reims ACC sectors refer to this image:

3 Procedures for Coordination

3.1 Definitions

A release is an authorization for the accepting ATS unit to climb, descend and/or turn (by no more than 45°) a specific aircraft before the transfer of control point. The transferring ATS unit remains responsible for separation within its Area of Responsibility unless otherwise agreed.

Wherever VATSIM callsigns are used to describe the terms of a certain procedure, this procedure is also applicable for all higher stations that take over the responsibilities of said station. E.g., procedures for an APP-stations are also applicable for the respective CTR station fulfilling the duties of said APP station.

The use of VATSIM callsigns in this document includes any variation of said callsign. E.g., any procedure applicable for XYZ_CTR may also be used by XYZ_X_CTR or XYZ_1_CTR.

3.2 Abbreviations

ACC	Area Control Center	kts	Knots
AD	Aerodrome	LoA	Letter of Agreement
ADEP	Aerodrome of Departure	LoR	Line of Responsibility
ADES	Aerodrome of Destination	NM	Nautical Mile
AoR	Area of Responsibility	NVFR	Night Visual Flight Rules
APP	Approach Facility	RFL	Requested Flight Level
ATS	Air Traffic Services	Rlsd	Released
COP	Coordination Point	SSR	Secondary Surveillance
CTR	Center/Enroute Facility	Radar	
FIR	Flight Information Region	TMA	Terminal Manoeuvring Area
FIS	Flight Information Service	UAC	Upper Area Control Center
FL	Flight Level	VFR	Visual Flight Rules
GND	Ground	WEF	With Effect From
GNG	Global Nav Generator		
gng.aero-nav.com			

3.3 General Conditions

Coordination of flights shall take place via the agreed coordination points (COP).

Coordinated flights shall be handed off via a valid COP. Any deviation shall be coordinated verbally, by text or by Euroscope inter-sector coordination.

Traffic shall be handed off at the levels, defined in the regulations below. If a specified level restriction cannot be met due to a lower RFL, traffic shall be handed off at RFL, if this does not cause a conflict with any other traffic. Otherwise, traffic shall be coordinated.

If a traffic situation is not covered herein or closely matching a covered one, individual coordination between the concerned sectors shall be made.

After Transfer of communications, traffic is NOT released for climb, descent or turns until Transfer of control or otherwise specified in this Letter of Agreement.

↓FLxxx / ↑FLxxx means „descending / climbing to a specified FL“, without any further restriction. Any required crossing/speed restriction shall be added separately. At level means that the aircraft shall be in level flight on a published flight level and in accordance with east/west odd/even policy.

FLxxxA means “climbing and above specified FL”, FLxxxB means “descending and below specified FL”.

3.4 IFR flights from Karlsruhe UAC to Reims ACC

3.4.1 Arrivals

Arrival AD	COP	Level Allocation	Special Conditions	FROM Sector	TO Sector
Paris Group	LUPEN	FL340B		SLN	XE
All other	LUPEN	EVEN		SLN	UE/XE/KE/HE
All other	ELVET	ODD		SLN	UE/XE/KE/HE

3.4.2 Departures

Departure AD	COP	Level Allocation	Special Conditions	FROM Sector	TO Sector
Paris Group	LUPEN	FL350		KE	SLN

3.5 IFR flights from Reims ACC to Karlsruhe UAC

3.5.1 Arrivals

Arrival AD	COP	Level Allocation	Special Conditions	FROM Sector	TO Sector
EDDM	LUPEN	MAX FL370	(*1)	HE	SLN
ED**	LUPEN		(*2)		
All Other	SOSAD	EVEN	(*3)	UE/XE/KE/HE	SLN

(*1) Note: Reims ACC may clear flights DCT GESLU

(*2) Note: ED** Arrivals are not accepted by Karlsruhe except for EDDM arrivals FL350 max to SLN

(*3) Accepted by Karlsruhe at FL360 and above.

3.6 Enroute level allocation

FROM Sector	TO Sector	Allocation
NTM	UE/XE/KE/HE	odd
SLN	UE/XE/KE/HE	even
UE/XE/KE/HE	NTM	even
UE/XE/KE/HE	SLN	odd

- Other levels available upon coordination request

4 Special Procedures

4.1 French corner

Karlsruhe UAC may cross Reims FIR without prior coordination and without transfer of communication within the following area:

Lateral limits: The part of Reims FIR dubbed French corner as depicted in appendix A.

Vertical limits: FL245 - FL660

Remarks: This procedure is suspended while military airspace is active within the area. Reims ACC shall notify Karlsruhe UAC of activation and deactivation of relevant military airspace.

4.2 Usage of military airspace

4.2.1 Usage of ED-R305 (TRA Lauter)

Unless otherwise coordinated, Reims ACC considers ED-R305 to be inactive. Langen ACC shall inform Reims ACC sectors EES and EE about the activation of ED-R305 or any parts thereof at least 10 minutes prior to intended use and when usage is terminated.

5 Transfer of Control and Transfer of Communication

5.1 Transfer of Control

Transfer of Control shall take place at the AoR boundary.

If the downstream sector in EuroScope is set to >.break<, the procedure 5.4 is suspended and transfer of communication can only take place after the downstream sector has assumed the flight via the appropriate function of the radar client.

If it becomes necessary to reduce or suspend transfers, a 5-minute prior notification is required.

When transfers are suspended, the hand-off procedure (5.4) is suspended.

5.2 Silent transfer of control

The following values for silent transfer of control apply:

- If preceding aircraft is faster: 10 NM
- If succeeding aircraft is faster by 20kts / M0.05 or less: 20 NM
- If succeeding aircraft is faster by 40kts / M0.1 or less: 30 NM

5.3 Transfer of Communications

Transfer of Communications shall take place no later than Transfer of Control.

5.4 Hand-Off procedure

Unless otherwise agreed between stations online, the following hand-off procedure shall apply:

1. The upstream sector sends the aircraft to the frequency of the downstream sector by voice or text.
2. The upstream sector initiates a transfer via the appropriate function of the radar client.
3. Upon initial call the downstream sector assumes the flight via the appropriate function of the radar client.

5.5 SSR Code Assignment

Both ATS units shall transfer flights on verified discrete SSR codes. Any change of SSR code by the accepting ATS unit may only take place after the transfer of control point.
